March 18, 2010

To Our Colleagues at Symcoat;

Too often during the course of business the basic courtesy of saying "thank you" for a job well done is overlooked. I want to let everyone at Symcoat know that Hyatt Die Cast and Engineering Corporation truly appreciate your service to our company.

The delivery and quality demands placed upon us by our customer for the components you process could not have been achieved without the help, cooperation, and high quality you provide.

Our team here at Hyatt Die Cast wants you to know that your efforts on our behalf have not gone unnoticed.

As you are no doubt aware, both in good times and economic periods such as these, it is critical to do whatever it takes to satisfy our customers. With your help we have done so, and our success to date is in no small part due to Symcoat.

It is refreshing to be partnered with a company that is willing to go the extra mile to help satisfy the sometimes very aggressive delivery requirements placed upon us. Symcoat has consistently done whatever it takes to help us meet those demands. For that, we all want to say thank you.

Sincerely,

General Manager
